1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest lower and upper threshold levels being variable, a calibration circuit operable to cause said frequency band selection unit to maintain said frequency band setting when said control voltage falls between said lower threshold level and said upper threshold level and, otherwise, when said control voltage lies below said lower threshold level, to cause said threshold level setting circuit to adjust said lower threshold level downward and adjust said upper threshold level upward as called for in claims 1 and 11. Therefore, claims 1-20 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
